Marc Llobera Villalonga

Full-Stack | DevOps

mrcl29.github.io/mrcl29/ · linkedin.com/in/marc-llobera-villalonga/ · +34 655 43 83 97 · m.llobera@outlook.com

Full-Stack Developer with over 1 year of professional experience and more than 2 years of total accumulated experience in programming. Experience in Backend with '**clean architecture**', **hexagonal architecture**, and **microservices architecture patterns** using **Python** and **Java** (**FastAPI**, **Flask**, **Spring**, **Spring Boot**). Demonstrable Frontend projects creating modern and attractive solutions with technologies such as **React**, **Angular**, **Astro**, and **TailwindCSS**. Transitioning to the **Cloud** ecosystem with experience in **AWS**, **Docker**, and **Linux**. Knowledge of industry-standard tools and languages like **Go (Golang)**, **Javascript**, **Typescript**, **C++**, **Node.js**, **GIT**, and agile methodologies (**Scrum**).

PROFESSIONAL EXPERIENCE

DialApplet **Valencia, Spain**
Backend Developer *January 2026 – Present*

- Development using the **Spring** framework and applying a scalable, layered architecture.
- Development of **microservices**, focusing the architecture on availability and fault tolerance.
- Object-Oriented Programming (**OOP**).
- Development of scalable **RESTful APIs** and implementation with external services such as non-relational databases (**MongoDB**, **Redis**).
- Implementation of advanced **Git** and **GitLab** practices for branch management, merges, pipelines, and deployment to production releases, ensuring deployment stability.

Alcort Ingeniería y Asesoría **Mallorca, Spain**
Full-Stack Developer *July 2024 – September 2025*

- Development of frontend (**JavaScript**, **HTML**, **Jinja**) and backend (**Python**, **MySQL**, **Flask**) improvements for FTTH provisioning software.
- Optimization of the **SQL** database, implementing stored procedures and redesigning table schemas, resulting in reduced query times for FTTH data management.
- Deployment and maintenance of the software in production environments with **Proxmox** virtualization (**LXC**).
- Letter of Recommendation (LinkedIn)

SKILLS ADICIONALES

- **Frontend**: React, Angular, Tailwind, CSS, JavaScript, HTML, Jinja, Astro
- **Backend**: Java, Spring, Spring Boot, Python, C++, FastAPI, Flask, Node.js
- **Databases**: SQL, NoSQL, PostgreSQL, MySQL, MariaDB, MongoDB, Redis
- **DevOps & Cloud**: AWS, Docker, CI/CD, Proxmox
- **Other**: Linux, Git, RAG, Data Mining, Grafana, Integration with external APIs
- **Skills**: Systems Thinking (software-infrastructure-network interaction), Best practices focused on scalability and maintenance, Self-directed learning
- Native **Spanish** and **Catalan**. Fluent in **English**.

FEATURED PROJECTS

Professional DJ Portfolio Website (Frontend) (jowysound.com)
Developed with Astro and Tailwind CSS to offer a modern and attractive design. Implements CI/CD methodologies and Vercel for continuous automatic deployments. Furthermore, it uses workflows to combine the speed of a static website with weekly automatic updates, integrating data directly from the YouTube, Spotify, and SoundCloud APIs.

RAG System for Business Queries (FullStack) (github.com/mrcl29/ChatbotEmpresarialVismel)
Development of a complete application (React, Node.js, FastAPI, PostgreSQL, Redis) implementing a RAG system with the OpenAI API. The system allows employees to make natural language queries against private corporate databases, automating access to information and streamlining decision-making (Business Automation).

Report Automation Script (Backend) (github.com/mrcl29/Grafana-Data-Report)
Python script for the automation of performance metrics reporting, interacting with the Grafana API. Demonstration of skills in monitoring and observability task automation.
